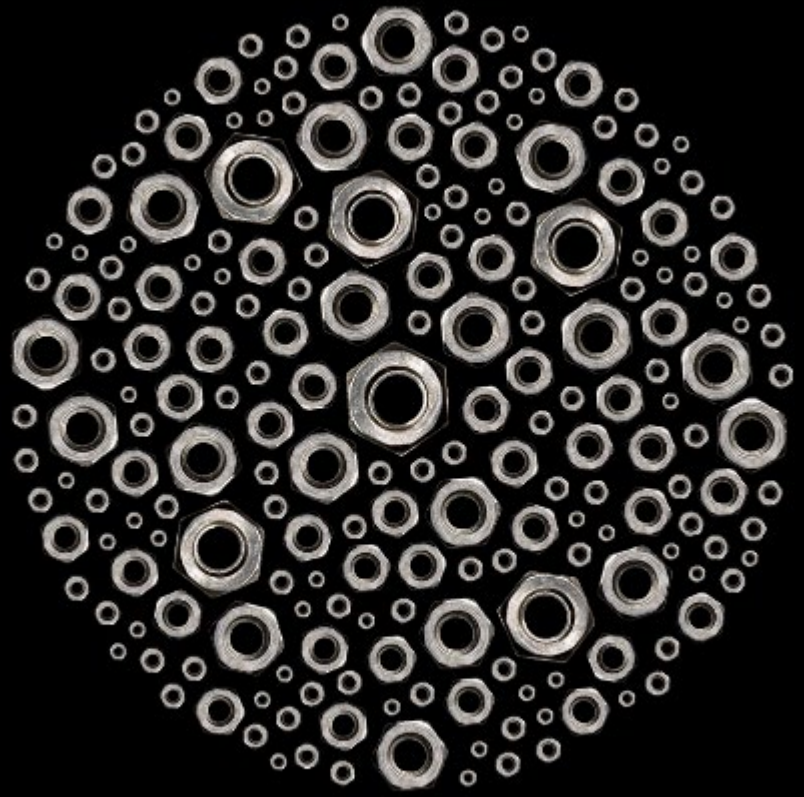
Deloitte.

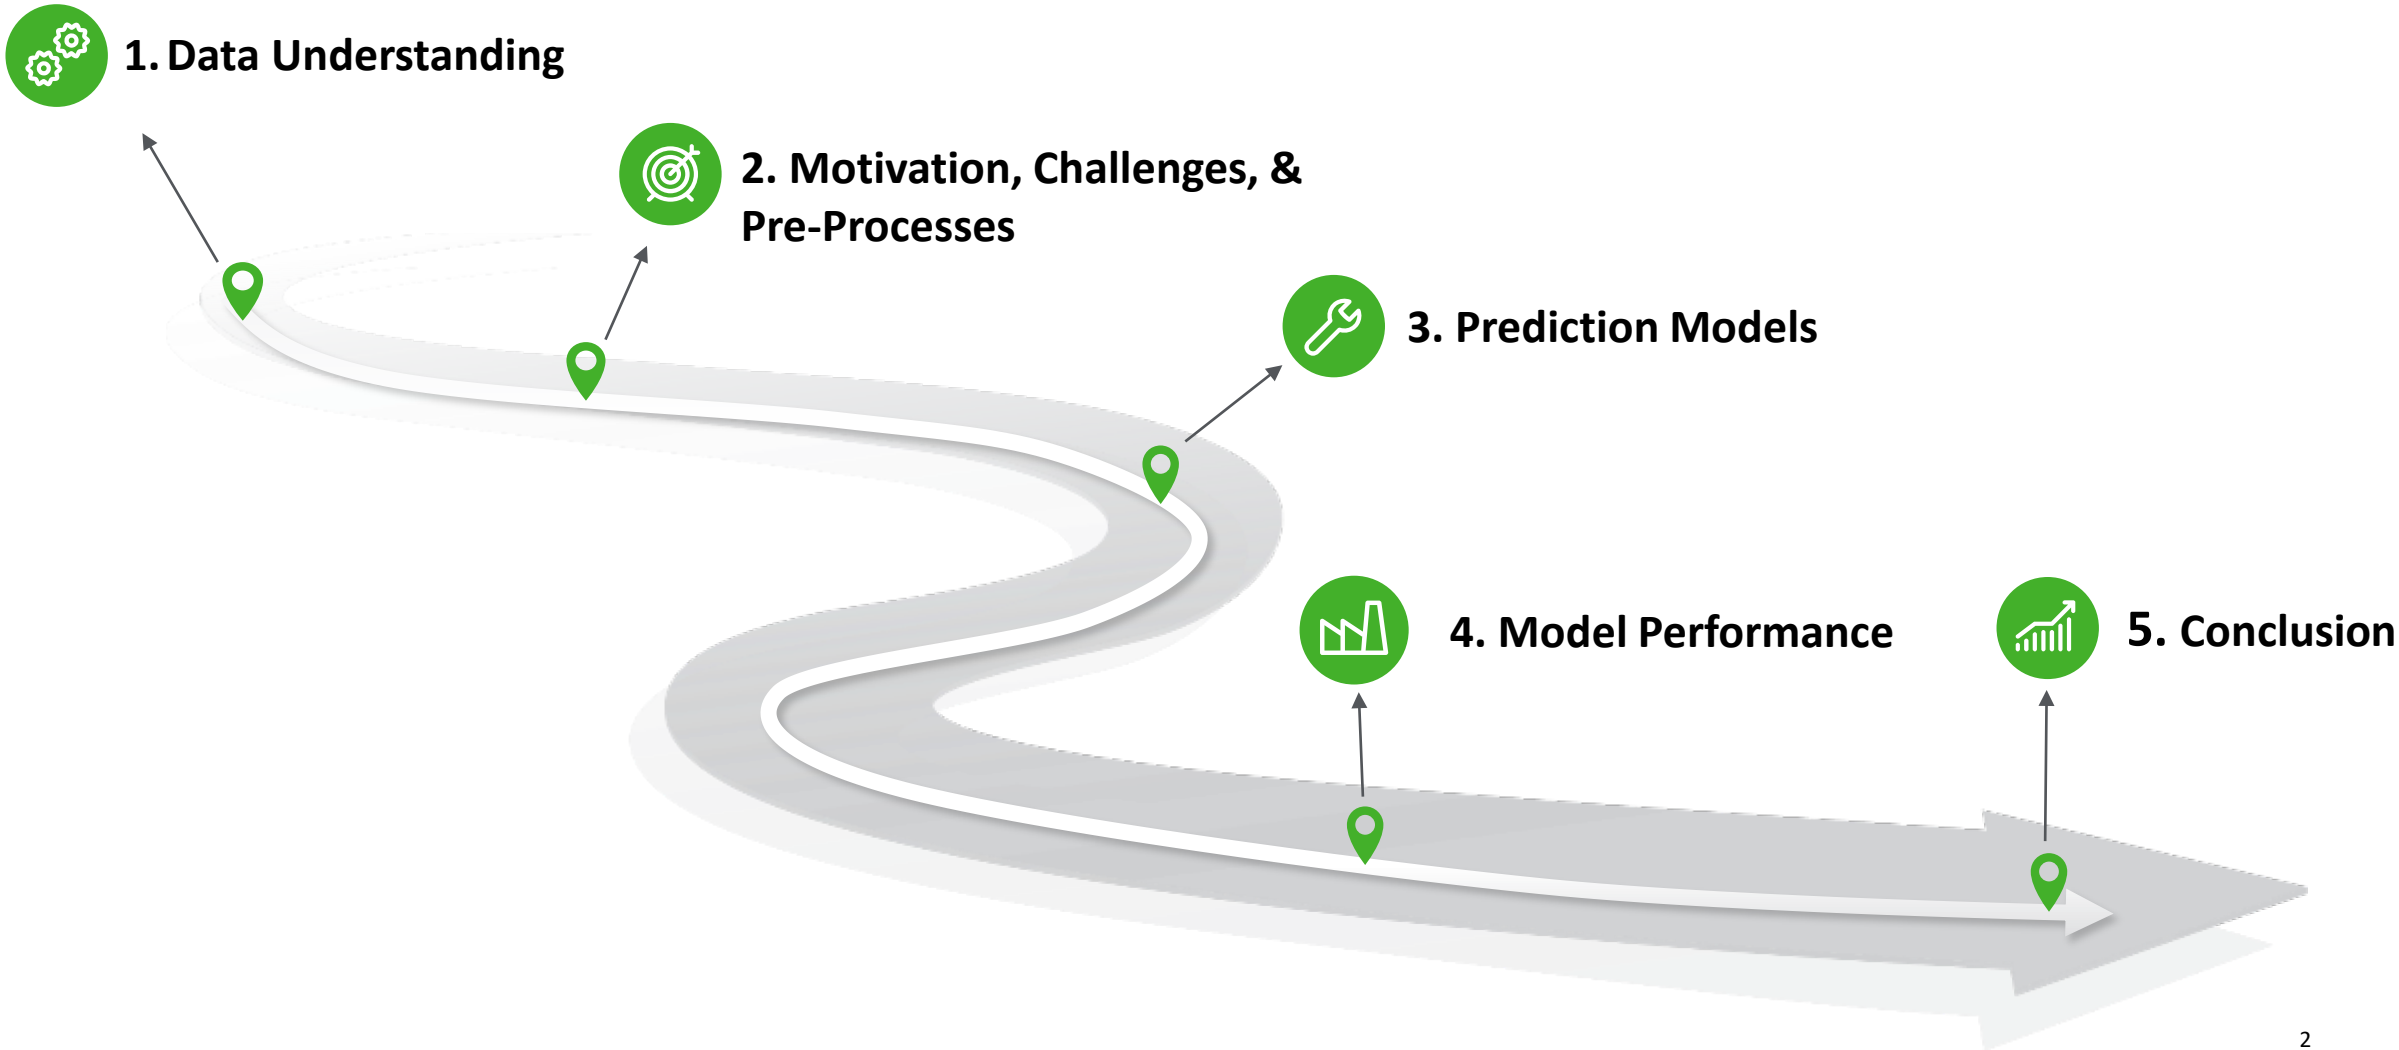


Optimal Machine Failure Prediction Model For Toyota

Tolulope Akinlabi, Brandon Kokin, Alexandria Lee-Robinson,
Diana Seo, Hanwen Zuo

MAKING AN IMPACT THAT MATTERS since 1845

Agenda



1. Data Understanding
2. Motivation, Challenges, & Pre-Processes
3. Prediction Models
4. Model Performance
5. Conclusion

Data Understanding

Significance of machine failure in vehicles

Situation

- Machine parts failure resulting in catastrophic losses (Toyota)
- 5 failure types and machine aspects

Complication

- Hard to identify tell-tale signs
  - If able to, often too late
  - Financial pressures

Solution

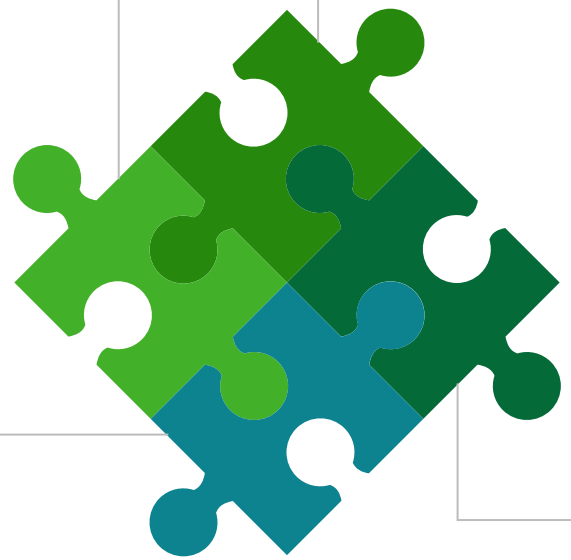
- Predictive modelling with high accuracy
  - Random Forest

Motivations, Challenges, and Pre-processes

Importance of pre-processing techniques

Challenges

- Imbalanced Dataset
- Categorical and Continuous
- Multiple failure types
- Data on different scales



Motivation

- Uniform preprocessing techniques to ensure comparability

Pre-Processing Techniques

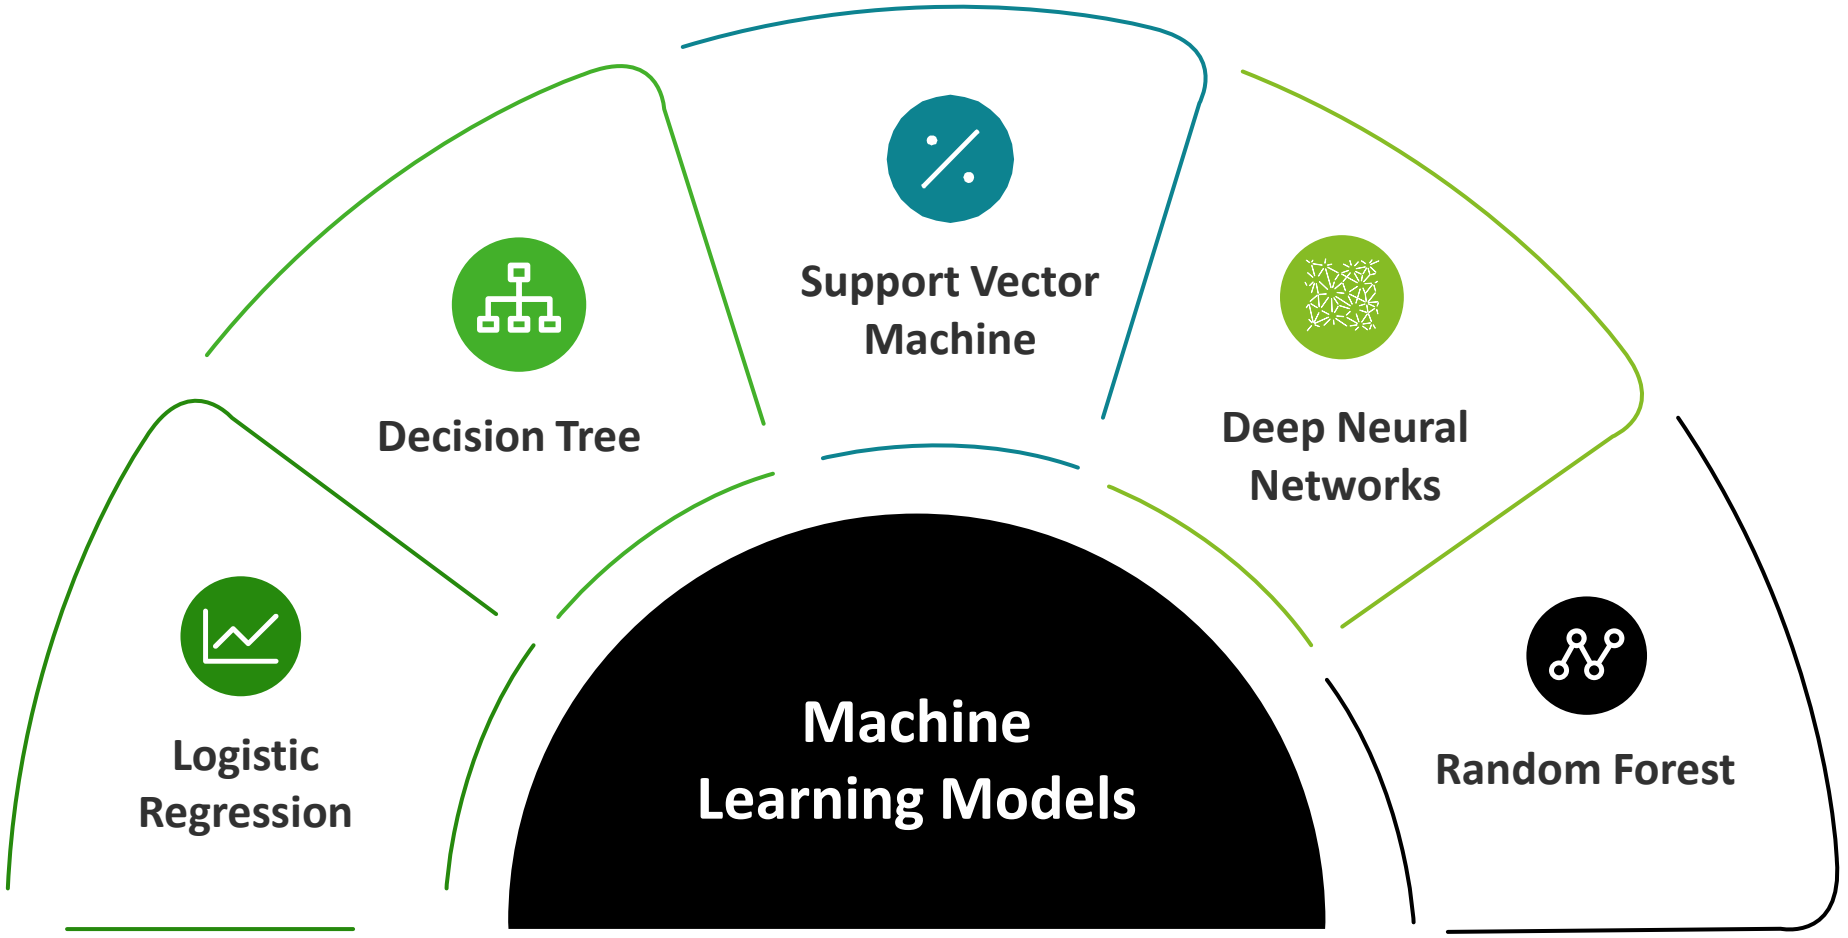
- Resampling techniques
- Binary Transformation
- Scaling of data
- Failure type consolidation

Results

- Preprocessed dataset optimized for model training

Prediction Models

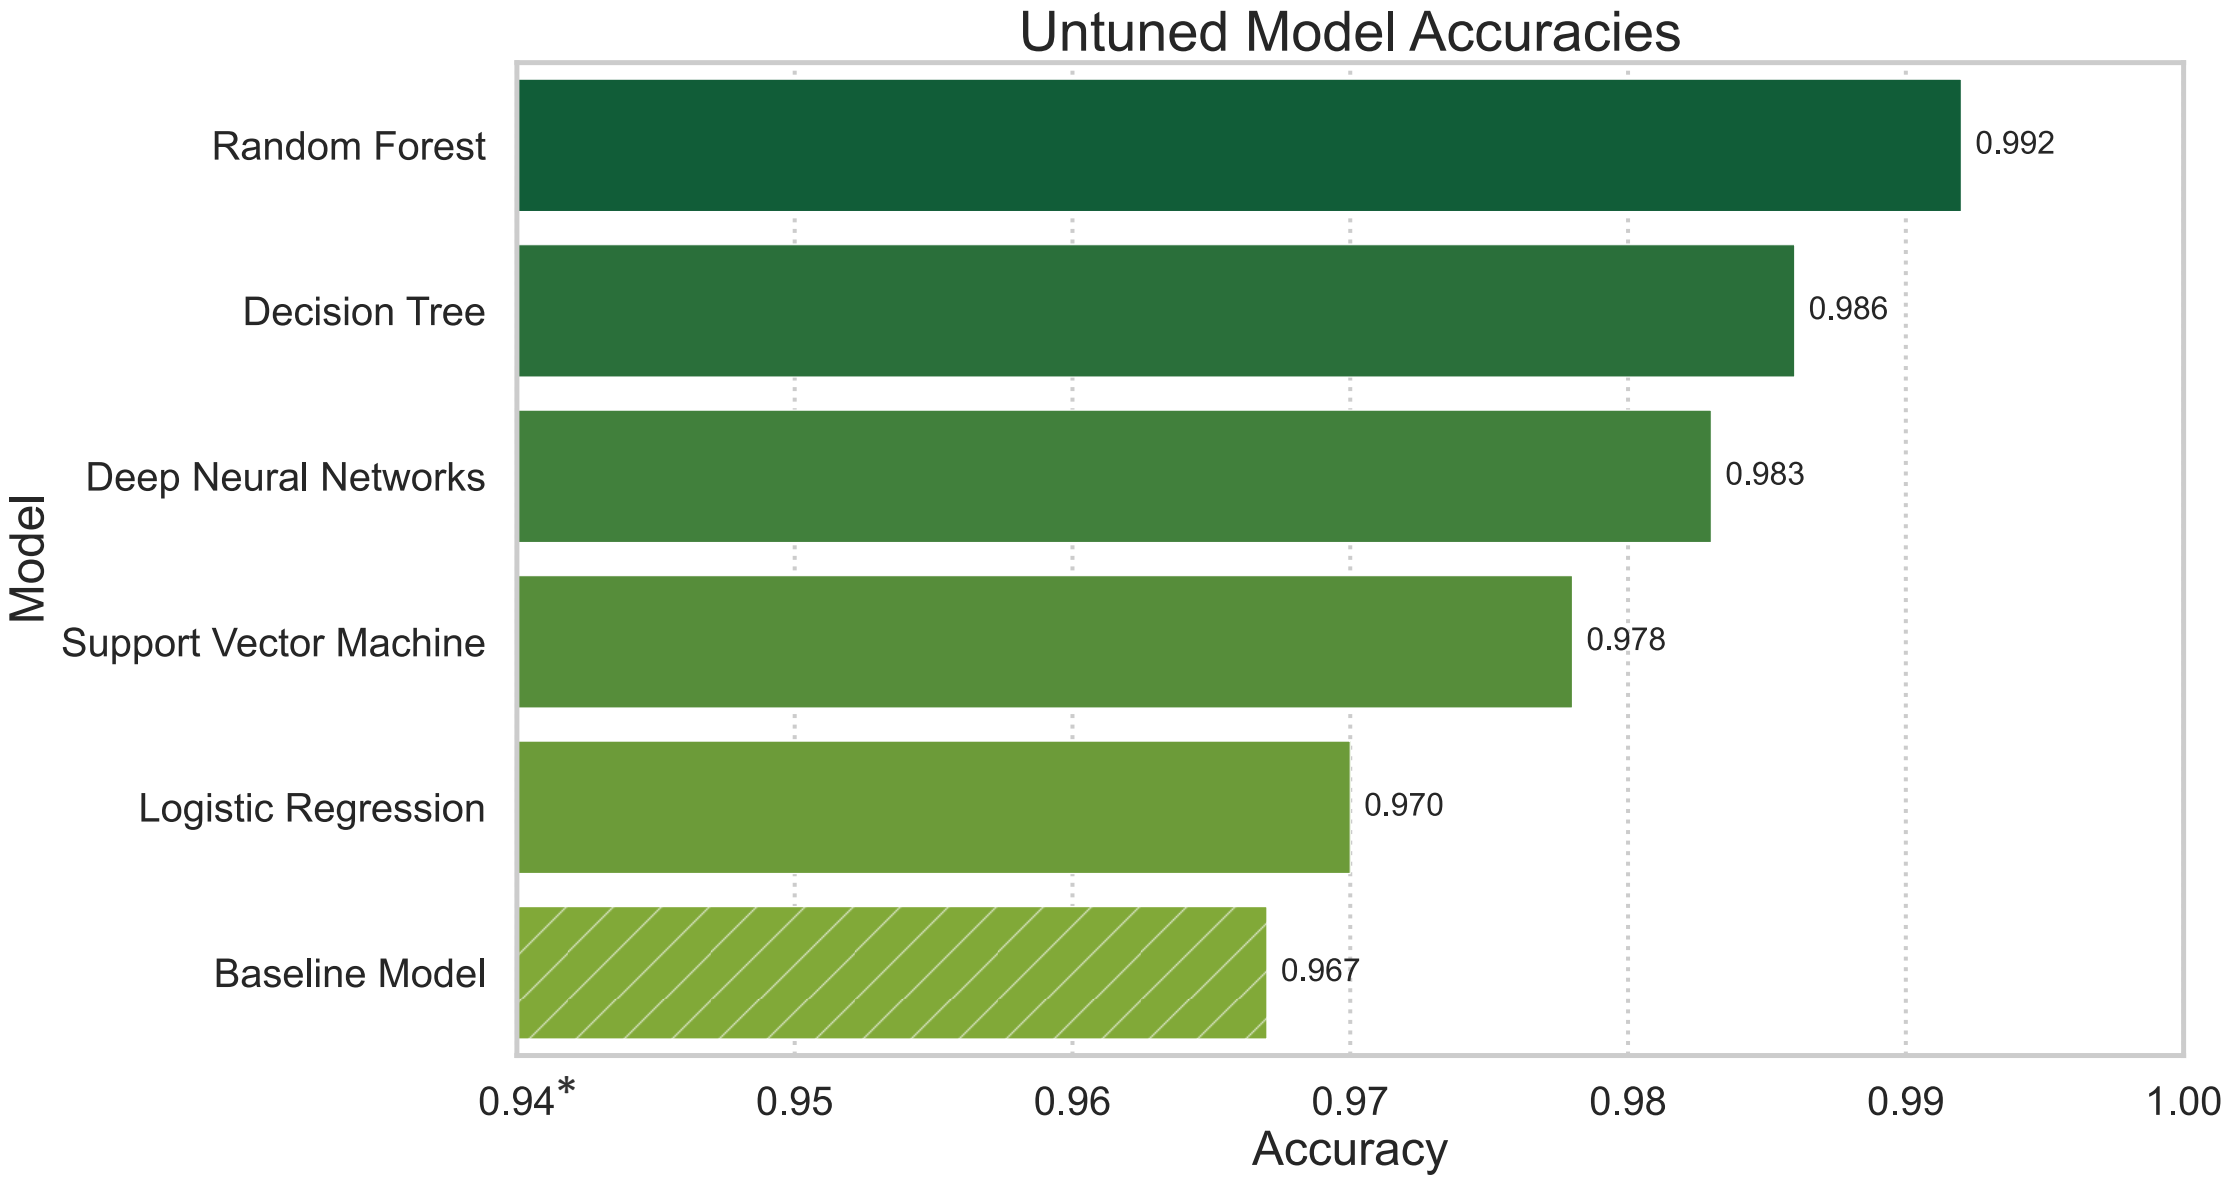
Selecting ML models for predicting machine failure



Model Performance

Holdout set accuracy before tuning

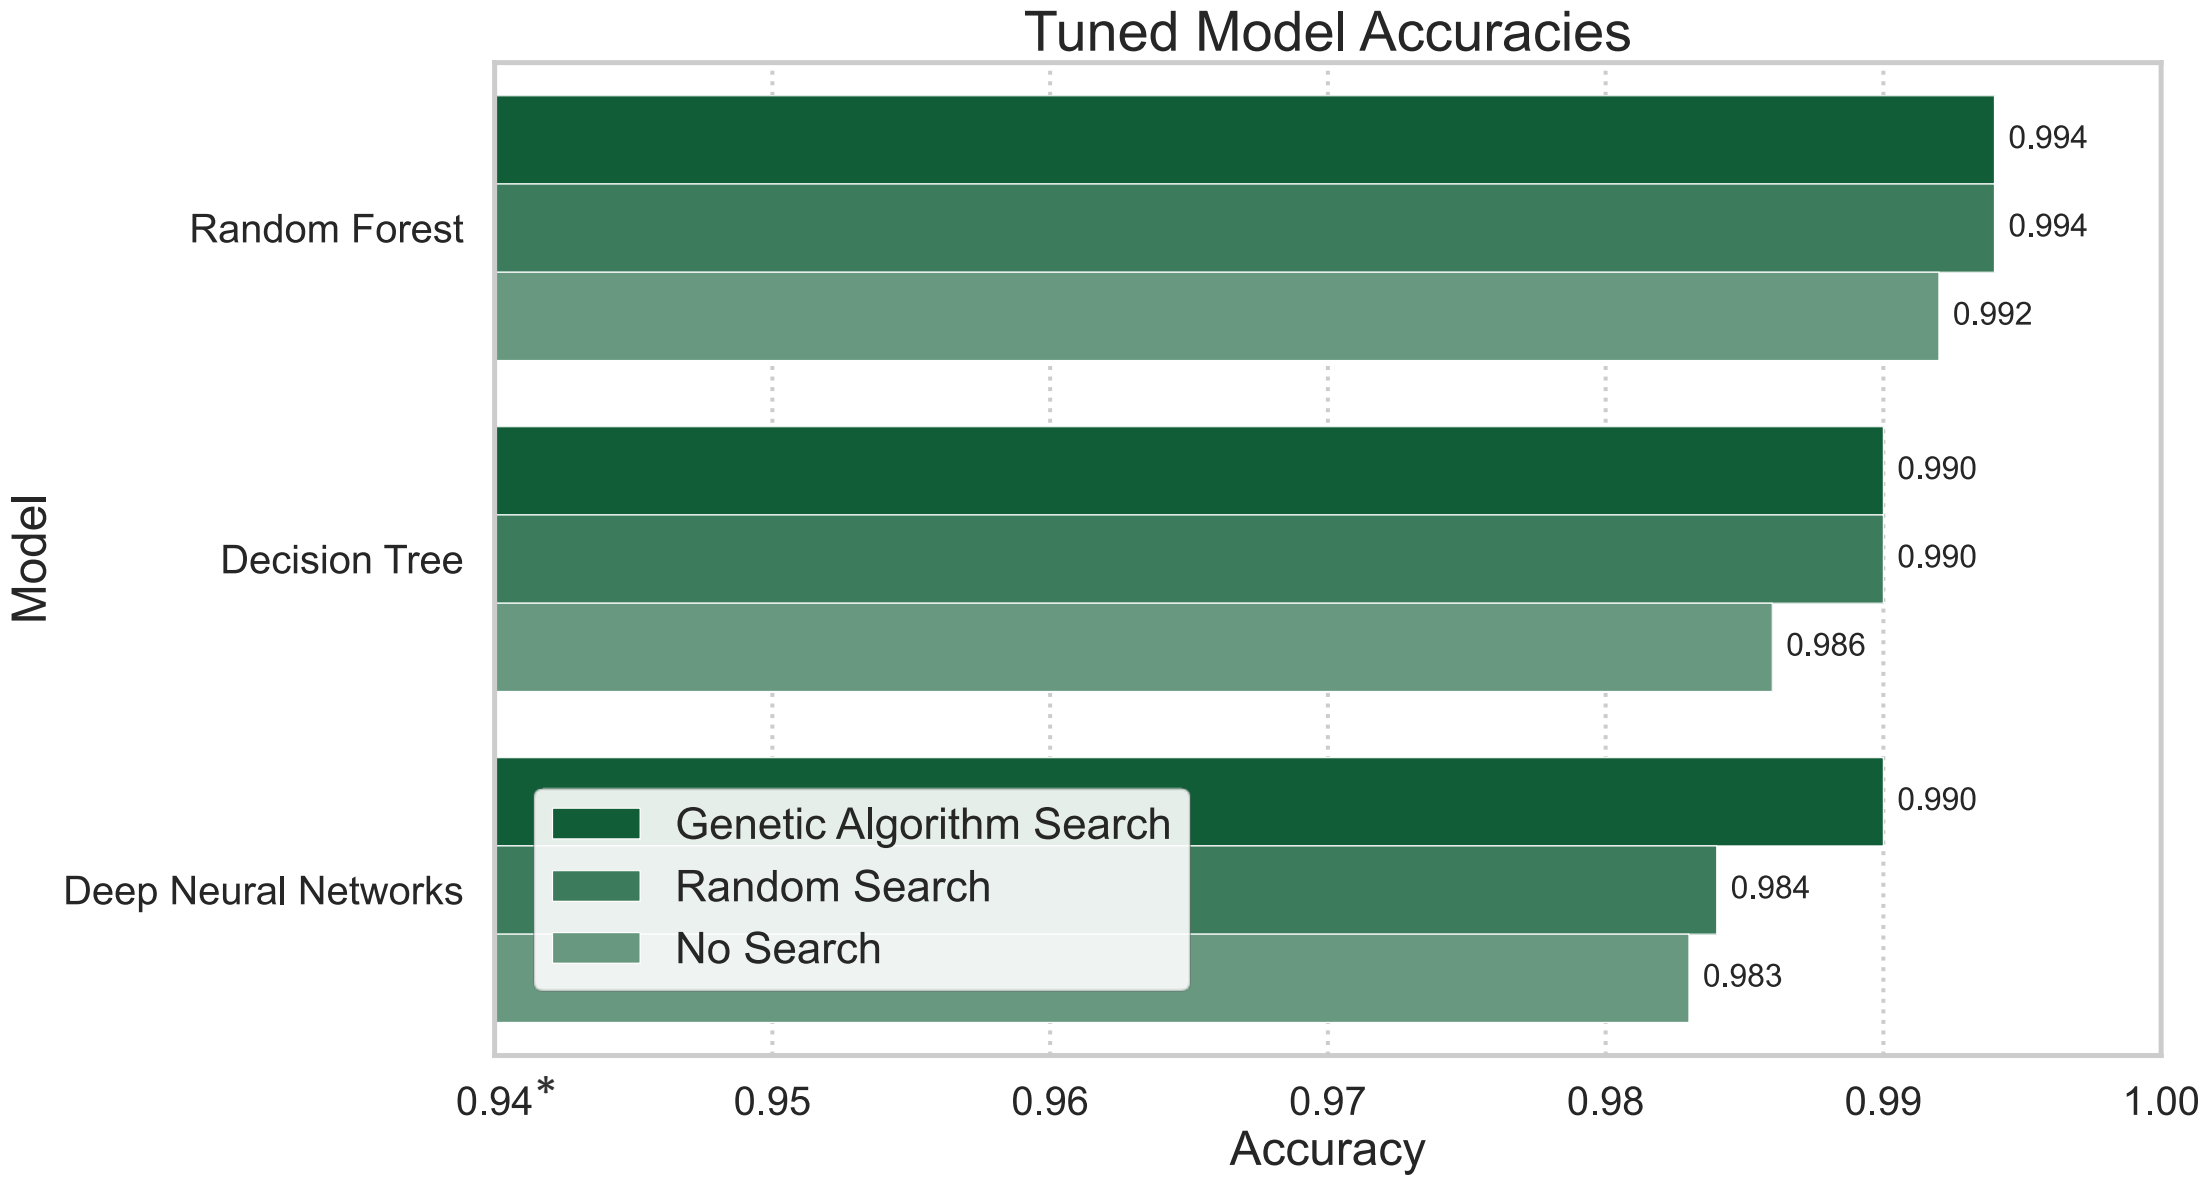
* Starts at 0.94; ticks represent 0.01 change



Model Performance

Holdout set accuracy after tuning

* Starts at 0.94; ticks represent 0.01 change



Model Performance

Confusion matrix

Random Forest		Decision Tree		Deep Neural Networks	
Precision:	0.97	Precision:	0.83	Precision:	0.88
Recall:	0.86	Recall:	0.86	Recall:	0.80
F1 Score:	0.91	F1 Score:	0.84	F1 Score:	0.84

Recommendation

Random Forest Model is the most optimal choice for Toyota in predicting machine failures

- Increased downtime
- Higher reactive maintenance costs
- Reduced operational performance
- Decrease in product quality and brand reputation

Current Status

- Best accuracy
- F1 score
- Solid precision and recall

Random Forest Model

- Decrease downtime
- Enhanced operational performance
- Reduce maintenance cost
- Increase product quality
- Protect brand reputation

Result

Deloitte.
